25X1A: Corment. The identity of the unit: at Techentin airfield has not been determined. The 119th Gds Hv Tank SP Regt of the 18th Mecz	
Div, among other units, had been carried there prior to the 1951 summer exercises, but another source reported at the end of August 1951, that the 59th Mecz Regt of the 18th Mecz Div was allegedly transferred from	
the airfield to the Reiter Kaserne. However, the 59th Necz Regt may still be located at the airfield, with some of its	25X1A
infantry components possibly being assigned to border guard duty and with its tank components, among other units, having remained at the airfield. The SF guns centioned in the present report may have actually	y
been T-34 tanks. However, the report may also refer to components of the unidentified medium tank regiment of the 18th Mecz Div which was	25X1B
last confirmed in Parchim in a report of October 1951 by enother source, but has not been observed by regular sources in Parchim since the completion of the maneuver period. In this	25X1A
case, the 59th Mecz Regt was possibly, and the 119th Gds My Tank SP Reg	
definitely transferred to another post.	25X1
